**Component Related Regulatory Information**
This product may be regulated, have exposure limits or other information identified as the following: Explosives, Lead compounds, organic, Lead (7439-92-1).

**General Product Information**
Note: The above ingredients are present at less than 0.72 grams in a hermetically sealed capsule.

This material has been evaluated using the criteria specified in European Union Directives 67/548/EEC, 99/45/EC and 2001/58/EC.

**Section 3 - Hazards Identification**

**Substance Preparation Classification**
Extreme risk of explosion by fire or other sources of ignition.

**Emergency Overview**
Product is a metal case with various electrical connectors. When activated, this product ejects small metal fragments propelled by rapidly expanding gas. Under normal conditions of operation and storage, no adverse health effects are expected. When activated, a small quantity of irritating and toxic fumes and gases are released, including lead oxide or other lead compounds. However, in normal operation, these fumes are diluted by a large volume of extinguishing agent (such as Halon) and pose minimal risk.

**Potential Health Effects: Eyes**
No adverse effects expected under normal conditions of operation. While exposure is unlikely, detonation fumes may irritate the eyes. If uninstalled product is activated, small metal fragments are ejected that could damage the eyes.

**Potential Health Effects: Skin**
No adverse effects expected under normal conditions of operation. While exposure is unlikely, detonation fumes may irritate the skin. If uninstalled product is activated, small metal fragments are ejected that could damage the skin.

**Potential Health Effects: Ingestion**
Ingestion is not an expected exposure route under normal conditions of operation.
Potential Health Effects: Inhalation
Inhalation is not an expected exposure route under normal conditions of operation. While exposure is unlikely, detonation fumes may irritate the respiratory tract.

*** Section 4 - First Aid Measures ***

First Aid: Eyes
For any eye exposure, flush eyes with plenty of cool water for at least 15 minutes. Seek medical attention if irritation develops or persists. If an eye is struck by shrapnel fragment, seek immediate medical attention.

First Aid: Skin
Wash skin immediately with soap and water. Seek medical attention if irritation develops or persists. If skin is injured by a shrapnel fragment, seek immediate medical attention.

First Aid: Ingestion
Ingestion is highly unlikely. If gastrointestinal irritation develops after exposure to detonation fumes, seek medical advice.

First Aid: Inhalation
Remove affected person to fresh air. If irritation or difficult breathing develops or persists, seek medical attention.

General Fire Hazards
Actuator devices can be detonated by fire or high heat, electricity, and high radiofrequency energy.

Hazardous Combustion Products
Lead compounds, potassium, and zirconium oxides and chlorides, carbon dioxide and monoxide.

Extinguishing Media
DO NOT FIGHT FIRES INVOLVING EXPLOSIVES! Try to keep fire from reaching explosives. Move product away from fire area if it has not yet been exposed to heat. Isolate area. Guard against intruders.

Fire Fighting Equipment/Instructions
Firefighters should wear full protective gear, including self-contained breathing apparatus.

*** Section 6 - Accidental Release Measures ***

Containment Procedures
Not applicable under normal conditions of operation.

Clean-Up Procedures
Carefully pick up devices. Repack undamaged devices for storage and separate visibly damaged devices for proper disposal.

Evacuation Procedures
Keep unnecessary personnel away.

Special Procedures
Damaged actuators should be electrically detonated under controlled conditions by properly trained personnel.

*** Section 7 - Handling and Storage ***

Handling Procedures
Uninstalled actuators should only be handled by personnel trained to handle explosive devices. Static grounding is recommended when handling unshunted devices.

Storage Procedures
Store in accordance with the applicable national, regional and local regulations regarding the safe handling and storage of explosive devices. At the minimum, store in a dry area at temperature range of 50 to 85 °F (10 to 30 °C). Keep away from flammable materials and sources of heat and flame. Prevent static discharges.

Specific Use
Fire extinguisher actuator
